

Since 1968 Prof. A. Squassabia Diagnostics and Physiotherapy Center have been committed to serving Verona citizens and providing a level of medical services which is appreciated by over ten thousand patients per year.

We have been part of the National Healthcare Service since 1980 and we are one of the few private *accredited* medical centers for Diagnostic exams and Physiotherapy in the Verona area.

APPOINTMENTS

Monday to Friday 8.30 AM - 6.30 PM
Saturday 8.30 AM - 12.30 PM

Diagnostic exams and visits also by telephone.

Appointments for physiotherapy sessions are held only in our center e presence of the patient.

RECEPTION AND PAYMENT

We recommend that our patients bring a medical prescription (“impegnativa” in case they use Italian public health service) and European health card or other identity card. Payment (whether the so-called “ticket” or the full private service) should be made at reception, before carrying out the exam. Physiotherapy sessions should be paid before the second session.

It is also possible to use our POS service for payment.

MEDICAL REPORTS

Our patients can collect their medical reports at reception from 2 to 5 working days after the execution of the exam. In urgent cases it is possible to collect the report and relative documents straight after the exam or within 24 hours. The medical report is delivered only to the treated patient or to a delegated person after properly completing and signing the appropriate proxy documentation.

We advise public-healthcare patients that if medical reports and documents are not collected within 30 days after the exam, U.L.S.S. will charge the patient for the entire cost of the exam (L. 29/12/1990 n.407).

PRIVACY

Sensitive data referring to our patients are treated in compliance with D.Lgs.196/03.

QUALITY STANDARDS

We are committed to keeping our services at the highest quality level: to accomplish this task we also introduced a Quality System which has been ISO 9001:2000 certified since 2005, updated to ISO 9001:2008 edition in 2008.

We supervise and periodically monitor the services using the following parameters:

- functionality and security controls of medical devices;
- radioprotection controls for X-rays devices made by an external Medical Physicist with specific qualification;
- periodic monitoring of customer satisfaction using questionnaires;
- periodic supervisory visits to our location by the Certification Agency.

CLAIMS AND COMPLAINTS

Our patients can address any claim or complaint to the reception desk.

In the shortest possible time we will examine the claims and we will take the appropriate measures.
